## SUMMARY

---

As a full stack developer with over 2 years of experience and a passion for building responsive and scalable web applications. With expertise in MERN, PERN, Next.js, and TypeScript, I focus on creating up-to-date, effective, and reliable solutions that work well for both users and businesses. Over the course of my career, I have successfully delivered a variety of projects, each showcasing my ability to tackle complex functionalities and deliver seamless user experiences. My commitment to continuous learning and attention to detail drives me to stay updated with the latest technologies and best practices, ensuring that my work is always at the forefront of innovation.

## EXPERIENCE

---

JULY 2023 – JULY 2024 **ALIMCOSOF PVT LIMITED, ISLAMABAD**

### Full stack developer

As a Full Stack Developer, I work on both the front-end and back-end of projects, using tools like Next.js, React.js, PostgreSQL, GraphQL, AWS, Nginx, and PM2. My job includes turning design ideas into responsive and attractive user interfaces. I also handle tasks like managing databases with PostgreSQL and setting up APIs with GraphQL and REST. Additionally, I take care of deploying applications, using AWS services, and configuring servers with Nginx and PM2. I work closely with different teams to ensure that we consistently deliver high-quality solutions and maintain a smooth user experience.

APRIL 2022- JUNE 2023 **LTE MARKETING AGENCY**

### Full stack developer

During my tenure as a Full Stack Developer at LTE Marketing Agency for more than a year, I played a key role in creating scalable and efficient web applications. Leveraging technologies like Node.js, React.js, and TypeScript, I was responsible for both front-end and back-end development, ensuring seamless integration and performance. My work involved collaborating with diverse teams to drive projects from concept to completion, consistently delivering high-quality solutions that met both user and business needs.

## SKILL

---

- |             |            |             |              |                |
|-------------|------------|-------------|--------------|----------------|
| ➤ NextJs    | ➤ NestJs   | ➤ Express   | ➤ GraphQL    | ➤ AWS          |
| ➤ Postgress | ➤ Rest API | ➤ MongoDB   | ➤ TypeScript | ➤ Git & GitHub |
| ➤ ReactJs   | ➤ NodeJs   | ➤ Bootstrap | ➤ Redux      | ➤ Tailwind css |

## WORKED ON PROJECTS

---

### JOB 45:

#### overview

Job45 is a dynamic website, designed to connect job seekers and employers. It will allow users to post job openings and search for employment opportunities easily. The platform aims to provide a seamless user experience, facilitating efficient job matching and improving the hiring process.

**Techs:** Nextjs , tailwind css , redux, typescript ,Nodejs Graphql , Sequelize , PosgressSql , express

**Link :** <https://jobstresures.com/>

### Corbett Safari:

#### overview

Corbett Safari is a dynamic safari booking website, Developed using Next.js, React, and Tailwind CSS. The backend is powered by PostgreSQL and GraphQL, allowing seamless interaction through GraphQL APIs. This project showcases my ability to create a responsive and engaging user interface while efficiently managing data and backend integration for a smooth user experience

**Tech:** Nextjs , Tailwind CSS , redux, typescript ,Nodejs , Rest API'S , PosgressSql , express

**Link :** <https://corbett.cruxdevs.com/>

### TRACKER:

#### overview

Tracker is a 3-Def Portal, a comprehensive application where I spearheaded the development of various components, ensuring efficiency and scalability of the codebase. I prioritized reliability by authoring comprehensive unit tests for component robustness. Additionally, I designed and implemented pages and seamlessly integrated REST API endpoints for enhanced functionality. Utilizing Redux for state management, I ensured seamless data flow and synchronization between components. Independently, I developed the backend using Node.js with GraphQL for optimized data querying, Sequelize for ORM, and PostgreSQL as the database.

**Tech:** Nextjs , tailwind css , redux, typescript ,Nodejs Graphql , Sequelize , PosgressSql , Express

**Link:** <https://www.admin.alimcosoft.com/>

### FOODIL:

#### Overview

I developed Foodil, an e-commerce website featuring distinct flows for Buyers, Sellers, and Guests. For Buyers, I implemented registration, product browsing, search and filter functionalities, cart management, order placement, and order history viewing. The Seller Flow enabled account creation, product addition, and tracking of product status. Guests were provided limited access to product viewing. Additionally, I built an Admin panel for user management, including account approval, rejection, or blocking, and product oversight. Collaborating as a Frontend Developer, I contributed to designing and implementing both the website and admin panel. Technologies utilized include React.js, Tailwind CSS, and Redux, ensuring a responsive and user-friendly interface.

**Techs:** ReactJs , Html , tailwind css , typescript , Graphql apis

**Link:** <https://foodil.co/>

**Polar:**  
**overview**

As a Frontend Developer with PolarPro team, I successfully completed few tasks assigned by management, including API integrations and designing and developing components and pages.**Techs:** nextjs , tailwind css , shopify  
**Link:** <https://polarpro.com/>

**RecipeFund:**  
**overview**

RecipeFund is an intuitive food ordering website that connects users with a wide variety of delicious recipes and local restaurants. Whether you're looking to try new dishes or order your favorite meals, RecipeFund makes it easy to explore, customize, and enjoy food delivered right to your door.

**Tech:** Tailwind CSS, React JS, NodeJS  
**Link:** <https://recipefund.com/>

**NEECA:**  
**overview**

As a Full Stack Developer, I spearheaded the creation of NEECA's 4-Def Portal, a comprehensive platform tailored to accommodate diverse user roles including Admin, Vendor, Lab, Printing Firm, and Customs. Leading the frontend development, I meticulously designed and implemented various components and pages, ensuring a seamless and intuitive user experience. Collaborating closely with UI/UX designers, I integrated frontend elements with backend functionalities, fostering a unified system.

**Tech:** Nextjs , tailwind css , redux, typescript , Nodejs GraphQL , Sequelize , PostgreSQL , express  
**Link:** <https://management.neers.com.pk/>

**En Route:**  
**overview**

Overview: As a Full Stack Developer with the En Route team, I successfully completed numerous tasks assigned by management, including backend integrations, and designing and developing components and pages.

**Techs:** React Native, Supabase, i18n

**Freedom  
Elite  
Funding**

I successfully completed the Fiverr project, including API development, integrations, designing, and developing components and pages. Additionally, I handled the deployment using AWS EC2.

**Tech:** nextjs , tailwind css, using nextjs api, etc
